SUMMARY

Software Engineer at Visa (Transaction Banking), building microservices in Go and maintaining automated test suites for RESTful APIs integrated into the CI/CD pipeline. I work with Product, Infrastructure and Design teams on Open Banking solutions.

Experience at global and national companies such as Visa/Pismo, IBM, Capgemini (Swiss Re project) and Stone, with Java, Kotlin, Go, Angular, React and SQL across back-end, front-end and Android mobile. Five years of background in Psychology, applied to communication, learning and teamwork. Open to QA and software development roles.

SKILLS

Proficient: Go (Golang), Java, Spring Boot, Angular 2+, back-end development, RESTful APIs, test automation, Cypress, relational databases (MySQL, PostgreSQL), Git, CI/CD, agile methodologies, object-oriented programming (OOP), problem solving.

Intermediate: Kotlin, Jetpack Compose, Firebase, TypeScript, ReactJS, React Native, Selenium, microservices, Docker, Kubernetes, Apache Kafka, performance optimization, design patterns, application security, debugging. COBOL, JCL, REXX (Mainframe z/OS).

Beginner: DevOps, AWS, advanced SQL, distributed systems, software architecture.

PROFESSIONAL EXPERIENCE

Software Engineer, Visa

Feb 2025 – Present · Full-time · Remote, Brazil

- Developed and implemented core microservices for the Transaction Banking platform using Go (Golang), enabling strategic integrations with international banks and expanding the solution's global connectivity.
- Created and maintained comprehensive automation test suites for RESTful APIs, ensuring end-to-end test coverage and integrating them into the CI/CD pipeline to drive the continuous delivery of high-quality software.
- Collaborated with cross-functional teams (Product, Infrastructure, and Design) on the architecture and delivery of Open Banking solutions, applying principles of clean, testable, and maintainable code.
- Acted as a champion for quality and development best practices, promoting a culture of ownership and knowledge sharing within internal diversity and technology communities.

Leadership Committee Member, ThinkDifferent, Pismo

Aug 2025 – Present · Full-time

- Contribute to the design and execution of initiatives that promote diversity, inclusion, and innovation across the company, collaborating with cross-functional teams to create safe and representative spaces and foster a culture of belonging.
- This role strengthens my systems thinking as a software engineer: leading with empathy, communicating with impact, and building technology solutions aligned with human and organizational values.

Android Developer (internship), Stone Co.

Feb 2024 – Nov 2024 · Internship · Remote

- Contributed to the development of new features for the Android application, applying my knowledge of Kotlin and Jetpack Compose to assist the team in improving performance and user experience.
- Was responsible for identifying and resolving bugs in specific application modules, using functional testing practices to ensure delivery quality and increase product stability.
- Actively participated in the ceremonies and rituals of an Agile (Scrum) team, collaborating in code reviews and absorbing development best practices from the senior team.
- Supported the integration of tools like Firebase for data analytics and, under guidance, studied the application of Kotlin Multiplatform (KMP) in the team's proofs-of-concept.

Apprentice · Scrum Master (volunteer project), SouJunior Labs

Nov 2023 – Present · Volunteer

FullStack Developer (Java | Angular | SQL Server), Capgemini

Aug 2023 – Apr 2024 · Full-time · Remote, Brazil

- Developed and delivered end-to-end features for critical applications in the insurance sector, using Angular to build dynamic user interfaces and Java to create robust and secure RESTful APIs.

- Optimized the performance of critical queries in SQL databases by refactoring queries and handling large data volumes, reducing response times and ensuring system scalability during peak loads.
- Created a library of reusable Angular components that standardized the user interface (UI) across different application modules, accelerating the development cycle and improving code maintainability.
- Operated within an Agile environment, collaborating with business analysts and QA teams to ensure each sprint's deliveries were aligned with requirements and the highest quality standards.

Software Developer (Java | Android | Angular | COBOL | React | QA), IBM

Sep 2022 – Aug 2023 · Full-time · Remote, Brazil

- Actively participated in the API modernization and migration project to the Axway platform, collaborating with the senior team to ensure secure integration between legacy systems and modern applications.
- Was responsible for performing maintenance on critical systems developed in COBOL and JCL (Mainframe z/OS), helping to ensure the continuity and stability of the client's business operations.
- Developed automation scripts in REXX to optimize routines in the Mainframe environment, which contributed to reducing manual tasks and increasing the team's efficiency.
- Gained hands-on experience with API testing and supported the implementation of Continuous Integration (CI) concepts, applying a quality-focused mindset within a large-scale enterprise environment.

Software Developer Intern (Java | Android | Angular | COBOL | Mainframe), IBM

May 2022 – Aug 2022 · Internship · Remote, Brazil

- Participated in a multidisciplinary rotational internship program.
- Developed and modernized banking applications using Java (Bradesco Next project).
- Optimized code and implemented payment-related features.
- Wrote documentation and refactored existing versions to improve performance and compatibility, in demo and production versions.

Freelance Developer (React.js, WordPress, organizational consulting), Self-employed

2019 – Present

- Developed and maintained web applications with React.js and WordPress.
- Created interfaces and web pages with Figma, Photoshop, Krita and GIMP.
- Built apps with FlutterFlow.

EDUCATION

- Bachelor's degree in Software Engineering · Estácio (in progress, since 2025)
- Postgraduate degree in Full Stack Development · Unifecaf (2025 – 2026)
- Postgraduate degree in Digital Law · Unifecaf (2025 – 2026)
- MBA in Compliance and Governance · Unifecaf (2025 – 2026)
- Associate degree in Systems Analysis and Development · Estácio (2021 – 2024)
- Digital Innovation One (DIO) bootcamps
